(1) Figures adjusted for delayed reports. (2) Exclusive of Yukon and Northwest Territories. (3) Total accumulated to the end of the current week from the first week ending in January of the year stated. (4) Includes cases where type was not specified. (5) Scarlet fever includes cases of streptococcal sore throat; streptococcal sore throat not reportable in New Brunswick and Quebec. (6) Type not specified. (7) Includes chancroid, granuloma inguinale and lymphogranuloma venereum. .. Not reportable.

THE SITUATION IN THE UNITED STATES (Source: "MORBIDITY AND MORTALITY-WEEKLY REPORT", U.S. National Office of Vital Statistics): Number of reported cases for the current week (previous week in parentheses):

Diphtheria 43 (17); Measles 1,007 (824); Meningitis, other 62 (70); Poliomyelitis, with paralysis 90 (73); Smallpox - (-); Undulant fever 11 (24); Encephalitis infectious 50 (54); Meningococcal infections 35 (34); Poliomyelitis, acute 282 (244); Poliomyelitis, without paralysis 148 (124); Typhoid fever 29 (24);

As expected reports of scattered outbreaks of influenza are being received which indicate a gradually increasing incidence. Reports received from the states indicate an estimated cumulative total of approximately 100,000 cases to date. This is shown by reports of increasing absenteeism in schools in Oregon, Colorado, Mississippi and Texas and a slight rise in absenteeism in a few industries in California. Reports of influenza in several areas of Mississippi, Texas, Utah, Oklahoma and Tennessee also suggest an increasing incidence.
