(1) Figures adjusted for delayed reports. (2) Exclusive of Yukon and Northwest Territories. (3) Total accumulated to the end of the current week from the first week ending in January of the year stated. (4) Includes cases where type was not specified. (5) Scarlet fever includes cases of streptococcal sore throat; streptococcal sore throat not reportable in New Brunswick and Quebec. (6) Type not specified. (7) Includes chancroid, granuloma inguinale and lymphogranuloma venereum. ... Not reportable.

THE SITUATION IN THE UNITED STATES (Source: "MORBIDITY AND MORTALITY-WEEKLY REPORT", U.S. National Office of Vital Statistics): Number of reported cases for the current week (previous week in parentheses):

Diphtheria 29 (23); Measles 818 (911); Meningitis, other 57 (59); Poliomyelitis, with paralysis 103 (105); Smallpox - (-); Undulant fever 25 (14); Encephalitis infectious 36 (67); Meningococcal infections 44 (25); Poliomyelitis, acute 211 (231); Poliomyelitis, without paralysis 63 (95); Typhoid fever 42 (31);

For the week ended October 4 the reports of influenza and influenza-like disease followed the pattern of the previous 3 or 4 weeks, namely an increase in cases in many areas. The estimated total number of cases was 350,000; this was based on various types of information. It includes estimates of prevalence or incidence made by several State health officers, the number of individual cases notified by physicians in some States, or the amount of absenteeism in schools in others. The estimated cumulative total of 1,077,000 includes delayed reports from several States. These figures must be considered as very rough estimates and should not be regarded as showing the true incidence of influenza.
