(1) Figures adjusted for delayed reports. (2) Exclusive of Yukon and Northwest Territories. (3) Total accumulated to the end of the current week from the first week ending in January of the year stated. (4) Includes cases where type was not specified. (5) Scarlet fever includes cases of streptococcal sore throat. (6) Nova Scotia reports cases of tuberculosis monthly (weekly figures are preliminary); for this disease the 1958 cumulative totals for Canada include cases for Nova Scotia up to the end of the previous calendar month. (7) Type not specified. (8) Includes chancroid, granuloma inguinale and lymphogranuloma venereum. .. Not reportable.

THE SITUATION IN THE UNITED STATES (Source: "MORBIDITY AND MORTALITY-WEEKLY REPORT", U.S. National Office of Vital Statistics): Number of reported cases for the current week (previous week in parentheses):

Diphtheria	11 (14)	Measles	40,004 (36,869)	Meningitis, other	46 (32)	Poliomyelitis, with paralysis	6 (5)	Typhoid fever	14 (16)
Encephalitis, infectious	40 (31)	Meningococcal infections	48 (47)	Poliomyelitis, acute	14 (12)	Poliomyelitis, without paralysis	5 (2)	Undulant fever	16 (17)

The number of poliomyelitis cases reported for the first 4 weeks of the 1958-59 disease year which began about April 1 is almost 60 per cent lower than the number for the same period last year. The number of paralytic cases is about one half of that for last year. Poliomyelitis cases have been reported more frequently in the southern part of the country, which is to be expected at this time of year.

*NEWFOUNDLAND reports Streptococcal sore throat (epidemic) at Lewisporte and Norris Arm, Gander District.
