(1) Figures adjusted for delayed reports. (2) Exclusive of Yukon and Northwest Territories. (3) Total accumulated to the end of the current week from the first week ending in January of the year stated. (4) Includes cases where type was not specified. (5) Scarlet fever includes cases of streptococcal sore throat; streptococcal sore throat not reportable in New Brunswick and Quebec. (6) Type not specified. (7) Includes chancroid, granuloma inguinale and lymphogranuloma venereum. .. Not reportable.

THE SITUATION IN THE UNITED STATES (Source: "MORBIDITY AND MORTALITY-WEEKLY REPORT", U.S. National Office of Vital Statistics): Number of reported cases for the current week (previous week in parentheses):

Diphtheria 27 (16); Measles 26,249 (24,724); Meningitis, other 22 (29); Poliomyelitis, with paralysis XX (37); Smallpox - (-); Undulant fever 21 (19); Encephalitis infectious 26 (35); Meningococcal infections 49 (67); Poliomyelitis, acute 68 (90); Poliomyelitis, without paralysis XX (35); Typhoid fever 42 (21);

Of the 27 cases of diphtheria reported this week, 5 were in Texas, 4 each in Michigan and South Carolina, and 3 in Georgia. Only 2 cases were reported in Indiana where a recent outbreak of the disease occurred. The location of these 2 cases was not given, but the outbreak was centered in and around Michigan City.

Approximately half of the cases of typhoid fever reported this week were in the East North Central (10), West South Central (7), and Middle Atlantic (5) Divisions. Since the first of the year, these divisions have reported 155 cases or about the same number (151) reported for the same period last year. For the country as a whole, the total for the first 14 weeks is 355 compared with 334 for the same period in 1955.

Number of cases YUKON TERRITORY, four weeks ended March 24: influenza, 58; rubella, 12; hepatitis, infectious, 4.
