(1) Figures adjusted for delayed reports. (2) Exclusive of Yukon and Northwest Territories. (3) Total accumulated to the end of the current week from the first week ending in January of the year stated. (4) Includes cases where type was not specified. (5) Scarlet fever includes cases of streptococcal sore throat. (6) Nova Scotia reports cases of tuberculosis monthly (weekly figures are preliminary); for this disease the 1958 cumulative totals for Canada include cases for Nova Scotia up to the end of the previous calendar month. (7) Type not specified. (8) Includes chancroid, granuloma inguinale and lymphogranuloma venereum. .. Not reportable.

THE SITUATION IN THE UNITED STATES (Source: "MORBIDITY AND MORTALITY-WEEKLY REPORT", U.S. National Office of Vital Statistics): Number of reported cases for the current week (previous week in parentheses):

Diphtheria 7 (15); Measles 36,392 (4,830); Meningitis, other 30 (36); Poliomyelitis, with paralysis 9 (10); Typhoid fever 15 (10);
Encephalitis, infectious 31 (29); Meningococcal infections 57 (64); Poliomyelitis, acute 17 (18); Poliomyelitis, without paralysis 4 (4); Undulant fever 18 (9);

A slight increase in deaths from all causes and from influenza and pneumonia in large cities was reported for the current week. This may have been due in part to an earlier cut-off time for the reports of the previous week because of Good Friday. The number of deaths from all causes was 11,756, and for influenza and pneumonia, it was 516.

*NEWFOUNDLAND reports Influenza (epidemic) at Princeton, Southern Bay and Bonavista Bay.
