(1) Figures adjusted for delayed reports. (2) Exclusive of Yukon and Northwest Territories. (3) Total accumulated to the end of the current week from the first week ending in January of the year stated. (4) Includes cases where type was not specified. (5) Scarlet fever includes cases of streptococcal sore throat. (6) Nova Scotia reports cases of tuberculosis monthly (weekly figures are preliminary); for this disease the 1958 cumulative totals for Canada include cases for Nova Scotia up to the end of the previous calendar month. (7) Type not specified. (8) Includes chancre, granuloma inguinale and lymphogranuloma venereum. .. Not reportable.

THE SITUATION IN THE UNITED STATES (Source: "MORBIDITY AND MORTALITY-WEEKLY REPORT", U.S. National Office of Vital Statistics): Number of reported cases for the current week (previous week in parentheses):

Diphtheria	38 (36)	Measles	2,064 (1,743)	Meningitis, other	145 (168)	Poliomyelitis, with paralysis	155 (140)	Typhoid fever	26 (25)
Encephalitis, infectious	59 (85)	Meningococcal infections	50 (43)	Poliomyelitis, acute	253 (289)	Poliomyelitis, without paralysis	65 (88)	Undulant fever	19 (12)

The number of reported cases of poliomyelitis for the week ended October 25 was 253; of these, 155 (about 60 per cent) were paralytic and 65 nonparalytic cases. The number of total cases is less than that for previous weeks but the number of paralytic cases is higher than for the week ended October 18 and is about the same as for the week ended October 11. The 155 paralytic cases also total a larger number than was reported during the comparable week in 1957 (73 paralytic cases) and in 1956 (142 paralytic cases). For the current week 4 States reported more than 10 cases of paralytic poliomyelitis: Texas, Michigan, Missouri, and California reported 27, 20, 16, and 11 cases respectively. The increase in paralytic cases compared to the previous week was most pronounced in Missouri and Texas.

*NEWFOUNDLAND reports Measles (epidemic) at Bell Island, C. B. and in Cartwright District, Labrador (350 cases).
